PROFILE SUMMARY

I have accrued experience working in front-end development on small projects for multiple companies to supplement my studies. I've worked both solo and as a member of a team and I find I can thrive within both environments. Working with a team has advanced my skill set greatly, supporting and learning from each other as the project progresses. I learn fast, and I'm always looking for a new challenge. I'm a team player and I believe I would make a valuable member of your company.

SKILLS

Programming Languages: HTML, CSS, PHP, JavaScript, TypeScript, Java, C#, Go, Dart
